

This is a perfect example of how to call out finishes on a Buckhorn Ranch plan submittal.

Call out the material, its placement and the color for all the exterior finish components.

The only thing not shown on this plan are the post and beams, Front Door and the Deck Railings. These should be called out as well.

On the next page is an example of how the physical samples should be submitted.

EAST GARAGE ELEVATION
SCALE: 1/4"=1'-0"

The size of your samples should not exceed 6" x 6" x 1.5" thick. If your using 8-inch cedar siding, provide a 4 inch piece of cedar with the finish on it.

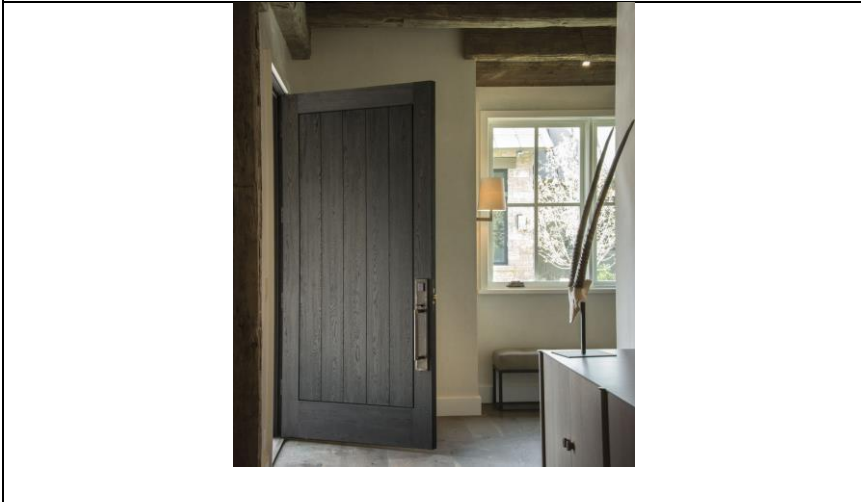

The same goes for post and beams. If you have 8" pine posts for the deck, do not submit finished section of that post. A small piece of rough-cut pine with the finish on it will do.

Example of sample size and type. These could be even smaller.

Example of stone sample in picture form

If you a specific door or other detail you can supply a photo

Swatches are ok but may be rejected in favor of physical sample.
